

Installation Instructions

Collaborative Stage Coding Instructions v02.05

System Requirements

The program works with 32- and 64-bit Microsoft® Windows® operating systems on x86-compatible processors. The minimum hardware requirements are the same as those of the Microsoft Windows operating system used.

Additional system requirements include—

- Microsoft Windows operating environments: 98/2000/XP/Vista/7/8.
- 512 MB RAM.
- Latest version of Microsoft Internet Explorer (recommended).
- 200 MB of free hard-disk space.

Installing or Updating CS Coding Instructions

Before you install or upgrade the CS Coding Instructions program, please read the following information.

Please Note: *The Coding Instructions for CSv02.05 are only available as a downloadable software program. During the process of downloading and installing the Coding Instructions, the program may also be referred to as “Online Help,” “Coding Instructions Online Help” and “CS Manual Online Help.” These various names are all referring to the same software program that contains the CS Coding Instructions for 02.05. Please take note of this when installing the program.*

- CS Coding Instructions program is not designed to upgrade automatically via the Internet.
- If someone else is responsible for maintenance of your computer, you may not be able to install the software program. In this case, consult the maintainer of your computer for assistance. Under some versions of Windows, you must be logged on as the administrator.
- If you are upgrading from a previous version of the CS Coding Instructions Online Help program, you must uninstall the existing program.
 - From the Windows **Control Panel**, choose **Add/Remove Programs**.
 - Select **CS Coding Online Help**.
 - Click the **Change/Remove** button.
 - Click **Next**; then **Remove**; then **Next** in succession on the resulting dialog boxes, and respond to any further prompts that appear.
 - If you receive a message during the uninstall process about deleting shared files, choose not to delete any shared files.
- Delete all files in the folder in which the previous version was installed; then delete the folder.
- If you are installing the CS Coding Instructions software program for the first time, you may install it on the drive and folder of your choosing; however, you cannot install it on a network drive. CS Coding Instructions must be installed on a local drive of your choosing.

Installation

1. Download the file named, CS Coding Instruction v02.05 to your computer from the CS Website.
2. Open the downloaded file. The installation program will direct you through the steps for installing CS Coding Instructions. If you are a first-time user, we recommend you select the defaults.

November 8, 2013

3. When installed, double-click the “CS Manual Online Help” icon on the desktop.
4. Select a tab from the pane on the left side of the window:
 - **Contents:** Select this tab to browse the Coding Instructions included and to view the order of topics. Open the Table of Contents by double-clicking on its book icon.
 - **Index:** Select this tab to search for a topic that has been indexed. Type a search term and press Enter, or double-click a search term in the index.
 - **Search:** Select this tab to perform a full-text search for a term that has not been indexed. Type the search term; then press Enter or click the List Topics button.
 - **Favorites:** Select this tab to bookmark favorite topics for fast retrieval.

CS Coding Instructions appear in a window using the standard Microsoft® HTML Help interface, with selected features enabled by third-party tools. For technical support on features and behavior of HTML Help, consult Microsoft HTML Help documentation.
