## CS Release Notes v02.05 Manual Review for Recoding

Developed by  
Donna M. Gress, RHIT, CTR

This presentation was supported by the Cooperative Agreement Number DP13-1310 from The Centers for Disease Control and Prevention. Its contents are solely the responsibility of the authors and do not necessarily represent the official views of The Centers for Disease Control and Prevention.

# Manual Review

- Why manual review is necessary
  - Prior instructions did not result in optimal coding
  - Automatic conversions not possible due to coding choices
- Limited to 5 scenarios

# Release Note Information Available

- Schema
  - Lists the affected schema(s)
- Review Data Field and Codes
  - Describes which data fields and codes should be selected for the review
  - Run a report on the registry database to identify these cases

# Release Note Information Available

- Description of Review
  - Details include
    - why the review
    - how to assess
    - correct codes to assign
- Estimate of Cases Affected
  - Provides a national estimate of SEER cases involved
  - Infer the number of cases at your facility or registry
